

SARENS HYDRAULIC CRANES

- DISCOVER OUR MOBILE HYDRAULIC CRANES

- most mobile hydraulic cranes can drive on public roads
- crane capacities from 5 to 1.200t
- maximum allowed axle load on public roads: 12t (can vary depending on national legislation)
- counterweight can be transported on the crane or by separate truck

- ADVANTAGES

- short mobilization and set-up time
- can perform precision work in confined areas
- high level of mobility and versatility
- many configurations possible

FOR US, HEAVY LIFTING IS A HIGH CRAFT. FOR US, EXCELLENCE IS DEDICATION TO INNOVATION AND THE PERPETUAL QUEST FOR A PROJECT FLAWLESSLY DELIVERED

HYDRAULIC CRANE TYPES

• ALL TERRAIN CRANES

- can be used on public roads as well as off-road
- maximum mobility and versatility
- crane capacities in Sarens fleet: 30 till 1.200t

• TRUCK MOUNTED TELESCOPIC CRANES

- telescopic boom mounted on a truck
- designed for frequent and long-distance travel
- efficient road transport and fast mobilization
- versatile and good manoeuvrability
- crane capacities in Sarens fleet: 30 till 80t

• ROUGH TERRAIN CRANES

- used on rough terrain
- compact design and versatile
- rugged axles and machine superstructures withstand challenging environments
- excellent gradeability
- can drive with small loads
- crane capacities in Sarens fleet: 12 till 150t

• CRAWLER CRANES

- transported to site by truck
- can travel with load
- crane capacities in Sarens fleet: 16 till 220t

• PICK AND CARRY CRANES

- can drive with load
- steering flexibility for moving in tight spaces
- work ready, no outriggers needed
- crane capacities in Sarens fleet: 5 till 33t
